EXECUTIVE SUMMARY THE ESTATE OF WILLIAM F. RANDALL DBA VALLE VERDE WATER COMPANY DOCKET NO. W-01431A-13-0265

The Estate of William F. Randall dba Valle Verde Water Company ("Valle Verde" or "Company") is a certificated Arizona public service corporation that provides water service near the City of Nogales in Santa Cruz County. The average number of customers per Company during the test year was approximately 760 in its 1.5 square mile service territory.

On July 31, 2013, Valle Verde filed an application for a rate increase using a test year ending December 31, 2012. Staff issued its letter of sufficiency on August 30, 2013.

Valle Verde states that it experienced a \$26,332 test year operating loss. Valle Verde proposes a revenue increase of \$170,653 or 36.09 percent over Company proposed test year revenues of \$472,791 to \$643,444. The Company's proposed revenue increase would produce an operating income of \$86,099 for a 13.38 percent operating margin and provide \$48,195 of cash flow after all expenses, obligations under its WIFA debt and repayments under its main extension agreements are satisfied. The Company proposes to use a negative \$351,683 as its Original Cost Rate Base ("OCRB") which is also its fair value rate base.

Staff recommends a revenue increase of \$57,961 or 12.26 percent over the test year revenues of \$472,791 to \$530,752. The Staff recommended revenue increase would produce an operating income of \$53,353 which would provide \$48,000 of cash flow after all expenses and obligations under its WIFA debt including payments to cover the Debt Service Reserve. Staff recommends a negative \$388,497 as its OCRB which is also its fair value rate base.

INTRODUCTION

- Q. Please state your name, occupation, and business address.
- A. My name is Gerald Becker. I am an Executive Consultant III employed by the Arizona Corporation Commission ("Commission") in the Utilities Division ("Staff"). My business address is 1200 West Washington Street, Phoenix, Arizona 85007.

Q. Briefly describe your responsibilities as an Executive Consultant III.

- A. I am responsible for the examination and verification of financial and statistical information included in utility rate applications. In addition, I develop revenue requirements, and prepare written reports, testimonies, and schedules that include Staff recommendations to the Commission. I am also responsible for testifying at formal hearings on these matters.
- Q. Please describe your educational background and professional experience.
- A. I received a Masters of Business Administration with an emphasis in Accounting from Pace University. I am a Certified Public Accountant and a Certified Internal Auditor. I am a member of the Arizona State Society of Certified Public Accountants.

I have participated in multiple rate, financing and other regulatory proceedings. I attended the National Association of Regulatory Utility Commissioners ("NARUC") Utilities Rate School.

I began employment with the Commission as a utilities regulatory analyst in April 2006. Prior to joining the Commission, I worked as an Auditor at the Department of Economic Security and Department of Revenue in the Taxpayer Assistance Section. Prior to those

2

1

jobs, I worked for 15 years as an Auditor, Analyst, Financial Analyst, and Budget Manager at United Illuminating, an investor-owned electric company in New Haven, CT.

I am presenting Staff's analysis and recommendations in the areas of rate base, operating

3

4

Q. What is the scope of this testimony in this case?

56

A.

A.

revenues and expenses and revenue requirement. Staff witness Dorothy Hains is presenting Staff's engineering analysis and recommendations.

8

9

7

Q. What is the basis of your recommendations?

1011

sufficient, relevant, and reliable evidence exists to support the Company's requested rate

1213

information, accounting records, and other supporting documentation and verifying that

The regulatory audit consisted of examining and testing the financial

I performed a regulatory audit of the Company's application to determine whether

14

the accounting principles applied were in accordance with the Commission-adopted

15

NARUC Uniform System of Accounts ("USOA"). I also reviewed the Company's

16

financing applications to determine the propriety and financial impacts of the proposed

1718

19

BACKGROUND

transactions.

increase.

20

Q. Please review the background of these applications.

21

A. The Estate of William F. Randall dba Valle Verde Water Company ("Valle Verde" or

22

"Company") is a certificated Arizona public service corporation that provides water

23

service to customers near the City of Nogales in Santa Cruz County. Valle Verde is

24

owned by the estate of William F. Randall.

25

CONSUMER SERVICE

Q. Please provide a brief history of customer complaints received by the Commission regarding the Company.

The Company's current rates were authorized in Decision No. 71899, dated September 20, 2010. That Decision authorized a \$285,075 revenue increase, or 103.04 percent increase over then test year revenues of \$276,656, that provided a 10.09 percent operating margin. The negative fair value rate base of \$593,061 was not meaningful. Decision No. 71899 also authorized a temporary surcharge of \$.60 per thousand gallons to pay for indebtedness to the City of Nogales for water that was purchased when Valle Verde had problems with its own wells.

On May 17, 2012, the Company filed an application pursuant to A.R.S. §40-252 asking the Commission to amend Decision No. 71899 to continue a temporary surcharge and to apply the revenues gained thereby to pay Southwestern Utility Management, Inc., the Company's interim manager ("Interim Manager") which had been appointed by the Commission in 2007 to ensure the continuation of adequate service at reasonable rates. The Company had been owned and operated by William F. Randall; after his death, the Company fell into financial and operational disarray. At that time, the Company owed the Interim Manager \$78,589.03. The Commission issued Decision No. 73353 (August 21, 2012) which authorized continuation of the surcharge to pay indebtedness owed to the Company's Interim Manager, subject to certain conditions discussed more fully therein.

The debt to the Interim Manager is expected to be repaid by the time the instant case is decided, and is not included in Staff's recommended revenue requirements in this proceeding.

1 2

A search of Consumer Services complaint files reveals the following customer complaints A. against Valle Verde:

2010 – one complaint- new service

3 4

2011 – eight complaints – two (billing), one (deposits), one (could not reach Company)

5

2012 – zero complaints

6

2013 – one complaints – one (billing)

7

There have been no opinions filed in support or opposition to the rate case.

8

All complaints have been resolved and closed.

9

10

11

COMPLIANCE

Q. Please provide a summary of the compliance status of the Company.

12 13 A.

delinquency for the Company. As discussed more fully in the Staff Engineering Report,

A check of the Utilities Division Compliance Database indicates that there is currently one

14

Decision No. 71899 ordered the Company to monitor its water losses and, if such losses

15

exceeded 10 percent, the Company would prepare a report containing a detailed analysis

16

and plan to reduce water loss to 10 percent or less. To date, the Company has not filed

17

such report or plan, and test year water loss for the East System is 17 percent, as discussed

18 19 more fully in Staff's Engineering testimony. Staff recommends that any rate increase

20

approved in this proceeding not become effective until the Company submits a water loss reduction plan or a detailed cost benefit analysis for its East System, as required by

21

Decision No. 71899.

22

23

RATE APPLICATION

24

25

What are the primary reasons for the Company's requested permanent rate Q. increase?

A. The Company's application states that during the test year it experienced a loss of \$26,332 due to declining water sales.

SUMMARY OF PROPOSED REVENUES

Q. Please summarize the Company's filing.

A. Valle Verde proposes a revenue increase of \$170,653, or 36.09 percent over the Company proposed test year revenues of \$472,791, to \$643,444. The Company's proposed revenue increase would produce an operating income of \$86,099 for a 13.38 percent operating margin and a Debt Service Coverage ("DSC") of 1.37. The Company proposes a negative \$351,683 as its Original Cost Rate Bases ("OCRB") which is also its fair value rate base.

Q. Please summarize Staff's recommended revenue.

A. Staff recommends a revenue increase of \$57,961, or 12.26 percent over the test year revenues of \$472,791, to \$530,752. The Staff recommended revenue increase would produce an operating income of \$53,353 which would provide \$48,000 of cash flow after all expenses and obligations under its Water Infrastructure Finance Authority of Arizona ("WIFA") debt including payments to cover the Debt Service Reserve. Staff recommends a negative \$388,497 as its OCRB which is also its fair value rate base.

Q. What test year did the Company use in this filing?

A. The Company rate filing is based on the twelve months ended December 31, 2012 ("test year").

4

6 7

5

8 9

10

11 12

13

14

15 16

17

18 19

20 21

22

23 24 Q. Please summarize the rate base and operating income recommendations and adjustments addressed in your testimony for the Company.

A. My testimony addresses the following issues:

> <u>Utility Plant in Service ("UPIS")</u> – There are three adjustments made to UPIS. One is to remove capitalized expenses of \$28,740 from account 320.1, Storage Tanks. The second adjustment removes plant that is not used and useful by \$9,292. The third adjustment reclassifies several plant items among various NARUC accounts with no net change to UPIS.

> Accumulated Depreciation - These adjustments decrease Accumulated Depreciation by \$1,219 from \$2,038,838 to \$2,037,619. The adjustments of \$479 and \$740 correspond to the above adjustments to UPIS to remove capitalized expense and not used and useful plant, respectively.

> Purchased Power - This adjustment decreases Fuel and Power Expense by \$694 from \$33,909 to \$33,215 to remove the purchased pumping power costs related to continuing high water losses. While Staff recognizes that this adjustment and the adjustment to Chemicals Expense discussed below are low value adjustments, Staff recommends these monetary adjustments to augment Staff's recommendation that any rates approved in this proceeding not become effective until the Company achieves compliance by filing a plan to reduce its water loss below 10 percent, as discussed more fully in both the Compliance Section of this report and in the testimony of Staff's engineering Witness, Dorothy Hains.

to remove the chemical expenses related to continuing high water losses, as discussed above.

Chemicals – This adjustment decreases Chemicals Expense by \$24 from \$1,161 to \$1,137

Office Supplies and Expense – This adjustment decreases Office Supplies and Expense by \$7,663 from \$27,333 to \$19,670 to remove utility costs of \$2,583 not necessary for the provision of service and administrative fees of \$5,080 related to the WIFA that are not operating expenses and are instead treated 'below the line'.

Outside Services Expense – This adjustment decreases Outside Service Expense by \$7,663 from \$27,333 to \$19,670 to remove expenses that are non-recurrent or unnecessary for the provision of service.

Water Testing Expense – This adjustment increases Water Testing Expense by \$581 from \$7,584 to \$8,165 to reflect Staff's recommend level of expense in this proceeding.

<u>Insurance Expense</u> – This adjustment decreases Insurance Expense by \$2,323 from \$13,290 to \$10,967 to remove insurance expense for property that is not necessary for the provision of service.

<u>Depreciation and Amortization Expense</u> – This adjustment increases Depreciation and Amortization Expense by \$6,442 from \$101,017 to \$107,459 to reflect Staff's recommended adjustments to UPIS, the Staff recommended depreciation rates in this proceeding, and the application of Staff's calculated amortization rate to the Company's Contributions in Aid of Construction ("CIAC").

13

15

16

17

18

19 20

21

22

23

24

2526

Q. Did Staff identify adjustments to UPIS?

<u>Property Tax Expense</u> – This adjustment decreases property tax expenses by \$1,392 from \$18,558 to \$17,167 to reflect the property tax obligation on Staff's adjusted test year taxable income and to reflect an 18.5 percent assessment valuation that is expected to apply to prospective revenues.

<u>Income Tax Expense</u> – This adjustment increases income tax expense by \$7,617 from a negative \$7,617 to zero to reflect the Net Operating Loss carry forward that will eliminate any tax obligations of the beneficiaries of the estate.

RATE BASE

Fair Value Rate Base

- Q. Did the Company prepare schedules showing the elements of Reconstruction Cost
 New Rate Base?
- A. No, the Company did not. The Company requested that their original cost rate bases be treated as their fair value rate bases.

Rate Base Summary

- Q. Please summarize Staff's adjustments to the Company's rate base shown on Schedules GWB-3 and GWB-4.
- A. Staff made adjustments to reduce the Company's rate base by \$36,813 from a negative \$351,683 to a negative \$388,497 as shown on Schedules GWB-3 and GWB-4.

Rate Base Adjustments - Utility Plant in Service ("UPIS") and Accumulated Depreciation

- Q. What amount of UPIS did the Company include in its rate base?
- A. The Company included \$4,180,261 as UPIS.

1 2

3

Q.

Yes. Staff identified two adjustments to reduce UPIS by \$38,032 from \$4,180,261 to A. \$4,142,229, as shown on Schedules GWB-4, GWB-5, and GWB-6.

Rate Base Adjustment No. 1 – Remove Capitalized Expenses

4 5

UPIS.

6

7

Staff identified \$28,740 of expenses that were incorrectly included in UPIS. A. recommends a decrease of \$28,740 to the UPIS balance with a corresponding decrease of

Please explain Staff's recommended reclassification of capitalized expenses from

\$479 to Accumulated Depreciation, as shown on Schedules GWB-4 and GWB-5.

8

9

Rate Base Adjustment No. 2 – Not Used and Useful Plant

11

10

Q. Please explain Staff's recommended adjustment to plant that is not used and useful.

12

A.

A.

Staff recommends a decrease to UPIS of \$9,292 from the Company's proposed test year plant for plant items that are not used and useful, with a corresponding decrease of \$740 to

13 14

Accumulated Depreciation, as shown on Schedules GWB-4 and GWB-6.

15

16

Rate Base Adjustment No. 3 – Reclassification

17 18

Please explain Staff's recommended adjustment to reclassify certain items of plant. Q.

recommended reclassification has zero net impact on total UPIS.

19

recommends the reclassifications as shown on Schedules GWB-4 and GWB-7. Staff

Staff identified certain items of plant that were not recorded in the correct account. Staff

20

21

22

OPERATING INCOME

23 **Operating Income Summary**

24

What are the results of Staff's analysis of test year revenues, expenses and operating Q.

25 income for the Company?

for the Company.

1 2 A. Staff's analysis resulted in test year revenues, expenses, and operating income of \$476,699, \$476,118, and a negative \$3,908, respectively.

3

4

- Q. Is Staff recommending any adjustments to operating income in this case?
- 5
- A. Yes. Staff recommends the following adjustments.

6

7

Operating Income Adjustment No. 1 – Excess Water Loss

8

Q. Did the Company experience water loss in excess of 10 percent during the test year?

10

11

9

A.

experienced a water loss of 17.1 percent and 3.2 percent in its East and West systems, respectively, during the test year. These losses represent an overall loss of 12.3 percent

Yes. As described in the testimony of Staff witness Dorothy Hains, the Company

12

13

14

Q. Did Staff adjust Purchased Power and Chemicals Expense?

recommended maximum level of 10 percent.

15 16

Staff reduces Purchased Power and Chemicals Expense by \$694 and \$24, A. Yes. respectively.

17

18

19

A.

Q. Why did Staff adjust Purchased Power and Chemicals Expense?

20

greater detail by Staff witness, Dorothy Hains. The cost of the purchased power used to

21 22 pump the water that is lost does not provide a benefit to customers; consequently, Staff

The Company has water loss greater than that recommended by Staff as discussed in

23

reduced the purchased power to correspond to the portion of the water loss that is above Staff's recommended maximum level of 10 percent. Similarly, the cost of chemicals to

24

treat water that is lost does not provide a benefit to customers; consequently, Staff reduced

25

the purchased power to correspond to the portion of the water loss that is above Staff's

26

Q. What is Staff's recommendation?

A. Staff recommends decreasing the purchased power by \$694, from \$33,909 to \$33,215, and chemicals expense by \$24, from \$1,161 to \$1,137, to remove the purchased pumping and chemical costs related to continuing high water losses as shown on Schedules GWB-11 and GWB-12.

Operating Income Adjustment No. 2 – Office Supplies and Expense

Q. What amount of Office Supplies and Expense did the Company propose?

A. The Company proposes to include a total of \$27,333 which included \$954 for trash removal during the first 10 months of the year, \$579 for natural gas and \$1,050 for electricity used at a now defunct office, and \$5,080 of administrative fees paid to WIFA in connection with a WIFA loan.

Q. Did Staff adjust the Office Supplies and Expense proposed by the Company?

A. Yes.

Staff removed the trash removal costs of \$954 because the Company was unable to explain the business purposes of these expenses and also because these expenses occurred during the first ten months of the test year and then ceased., This indicates that, even if these were necessary expenses during part of the test year, their cessation by the end of the year would require their removal as a known and measureable change to test year results.

Staff removed the \$579 for natural gas and \$1,050 for electricity at the now defunct or former company office. As discussed more fully below under outside services, the Company has retained Southwest Utility Management ("SUM") as an interim manager

and SUM has its own offices. Payment of utility expenses on a former and now defunct office would be a duplicative and unnecessary burden on the ratepayers.

Staff removed the \$5,080 of administrative fees paid to WIFA because these costs are associated with supporting the WIFA debt. Like interest, administrative fees are part of the cost of borrowing and are not treated as operating expenses. Instead, these amounts are treated 'below the line' and are included in Staff's cash flow analysis used to calculate its recommended revenue requirements, as discussed more fully below.

Q. What is Staff's recommendation?

A. Staff recommends decreasing the Office Supplies and Expense by \$7,663 from \$27,333 to \$19,670, as shown on Schedules GWB-11 and GWB-13

Operating Income Adjustment No. 3 – Outside Services

Q. What amount of Outside Services Expense did the Company propose?

A. The Company proposes to include a total of \$151,235 for outside services consisting of \$128,937 for management fees, \$19,498 in legal fees, and \$2,800 in accounting fees.

Q. Did Staff adjust the Outside Services Expense proposed by the Company?

A. Yes. In response to a Staff data request the Company provided additional information regarding its Outside Services Expense.

Management Fees

In response to a Staff data request the Company provided additional information regarding its management fees for service provided by SUM. SUM charges the Company a fee of \$11.25 per month per customer. This billing resulted in charges of \$9,855.00 per month at

the beginning of the test year and \$9,866.25 at the end of the test year. However, a review of management fees indicates inclusion of 11 months of fees at \$9,855.00 per month, and two months of fees at \$9,866.25, plus \$1,050.00 for the management of certain WIFA loan related projects, less \$250.97 for a prior period or out of test year adjustment related to some labor that was previously billed to the Company by SUM. Staff recommends that management fees be set at \$9,866.25 per month, or \$118,395 annually, as shown on Schedules GWB-11 and GWB-14. Staff recommends that the costs related to the management of certain WIFA loan related projects are more appropriately included as part of the costs of those projects, and that prior period adjustments be disregarded.

Legal Fees

Q. What amount of legal fees did the Company propose?

A. In response to a Staff data request the Company indicates that it proposes total legal expenses of \$19,497.91, of which \$11,722.41 was paid to Moyes, Sellers and Hendricks, and \$7,775.50 was paid to William Wissler, Esq.

Q. Did Staff question the necessity of retaining two separate law firms?

A. Yes, Staff sent the Company a data request to address this and some other issues related to legal and insurance expenses. As of the date of writing this testimony, those responses were not yet received. However, Staff had received responses to previous data requests and bases the following on the responses already received. Staff will update its position in its surrebuttal testimony, as appropriate, based on the Company's outstanding responses to Staff's data request.

4

5 6

7 8

9

10 11

12

13

14

15

16 17

18

19

20 21

22 23

24 25

26

Q. Did Staff adjust the legal expenses proposed by the Company paid to Moyes, Sellers and Hendricks?

A. Yes. A review of the \$11,742.41 paid to Moyes, Sellers and Hendricks indicates that \$9,538.41 was paid for non-WIFA related expenses during the period from March 15, 2012 through September 12, 2012 and that these monies were mostly, if not entirely, related to the Company's request to re-open Decision No. 71899, as filed on May 17, 2012. Decision No. 71899 authorized a temporary surcharge of \$.60 per thousand gallons to pay for indebtedness to the City of Nogales for water that was purchased when Valle Verde had problems with its own wells. The purpose of the Company request in its §40-252 proceeding was to seek approval to continue its surcharge of \$0.60 per thousand gallons approved in Decision No. 71899 in order for the Company to continue paying an unpaid debt to SUM, its interim manager. The Commission issued Decision No. 73353 which authorized continuation of the surcharge to pay indebtedness owed to the Company's Interim Manager, subject to certain conditions discussed more fully therein.

Staff recommends a decrease of the legal expenses of \$9,538.41 to process the Company's §40-252 proceeding for two reasons. First, the amount is not expected to reoccur in future periods. Second, the expenses to re-open a prior rate case are expenses related to that prior rate case and should not be recovered in this proceeding.

Q. Did Staff adjust the legal expenses proposed by the Company paid to William Wissler, Esq.?

A. Yes. A review of the \$7,775.50 paid to William Wissler, Esq. indicates various purposes including some related to the estate and, therefore, not directly related to the provision of service. Staff acknowledges that the Company is owned by the estate and that services performed for the estate may be somewhat interrelated to concerns of the Company. At

appropriate.

What is Staff's recommendation?

2

1

3

4 5

5

Q.

A.

8

7

10

11

13

14

15

16

17

18

12 Accounting Fees

Q. What amount of accounting fees did the Company propose?

A. In response to a Staff data request the Company indicates that it proposes total accounting fees of \$2,800 of which \$1,800 was paid to Holm & Valenzuela, CPAs, P.C. for services in connection with preparation of the Utilities Division annual report and \$1,000 to Desert Mountain Analytical Services ("DMAS") to review and adjust books to amend the 2011 Utilities Division annual report.

this time, Staff recommends that the expenses paid to William Wissler, Esq. be shared

equally between the Company and its owner, the estate. Staff awaits the Company's

response to Staff's data request regarding this issue and may adjust its recommendation as

Staff recommends a decrease of \$3,887.75 to apportion the amounts paid to William

Wissler, Esq. Adding the \$3,887.75 related to amounts paid to William Wissler, Esq. to

the \$9,538.41 for amounts paid to Moyes, Sellers and Hendricks results in a reduction to

outside services for legal expenses of \$13,246.16, as shown on Schedule GWB-14.

19

20

21

22

23

24

25

Q. Did Staff adjust the accounting fees proposed by the Company?

A. Yes. Staff decreased the accounting fees by \$1,000 for the amounts paid to DMAS. Since these amounts were to correct the 2011 report, they are not expected to be ongoing. Also, to the extent that DMAS is correcting work performed by Holm Valenzuela, CPAs, P.C., the inclusion of the amounts paid to DMAS results in the ratepayers being burdened twice for the same service.

1

Q. What is Staff's overall decrease of the three items above?

3

A. Staff decreases outside services expense by \$24,968 from \$151,235 to \$126,267, as shown on Schedules GWB 11 and GWB-14.

4

5

Operating Income Adjustment No.4A – Water Testing Expense

6

Q. What amount of water testing expense did the Company propose?

7

A. The Company proposes \$7,584 of water testing expense.

8

9

Q. What is Staff's recommendation?

10

11

A. Staff recommends an increase of \$581 from \$7,584 to \$8,165 to reflect Staff's recommended level of expense in this proceeding, as discussed in Staff's Engineering

12

Report and shown on Schedules GWB-11 and GWB-15A.

13

14

Operating Income Adjustment No.4B – Insurance Expense

15

A.

Q. What amount of insurance expense did the Company propose?

16 17 In response to a Staff data request, the Company indicates that it proposes total insurance expense of \$13,290 including two policies insuring a location at 12 Garden View Court,

18

Nogales AZ. The premiums on these policies are \$1,878 and \$445 for a total of \$2,323.

19

Staff has yet to receive the Company's response to an outstanding data request to clarify

20

the business purpose of that location. However, during its visit to the Company, Staff

21

observed this location and notes that it was the residence of the late owner, Mr. Randall,

22

and was partially used as the now defunct office before the hiring of the interim manager

23

who has her own office. Although this location is also the site of Well #3, the premiums

24

on the building at this location are not necessary for the provision of service.

A.

1

3 4 Yes. Staff decreases insurance expense by \$2,323 from \$13,290 to \$10,967 to remove insurance expense not necessary for the provision of service, as shown on Schedules GWB11 and GWB-15B.

5

6

Operating Income Adjustment No. 5 – Depreciation and Amortization Expense

7 |

A.

Q. What is the Company proposing for Depreciation and Amortization Expense?

9

8

includes \$163,889 of depreciation expense offset by \$62,872 of amortization expense related to the Company's CIAC. The Company does not seek depreciation expense on

The Company proposes depreciation and amortization expense of \$101,017 which

11

10

certain items of plant that it considers to be fully depreciated.

12 13

Q. What adjustments did Staff make to Depreciation and Amortization Expense?

14

A. As discussed above in Rate Base Adjustments No. 1 and No. 2 and as shown on Schedules

15 16 GWB-4, GWB-5, and GWB-6, Staff removed certain items of capitalized expenses and

17

not used and useful plant. Accordingly, these items of plant are not included in the

17

amounts subject to depreciation, as shown on Schedule GWB-16.

19

Staff agrees with the Company that certain items of plant are fully depreciated and no longer subject to depreciation, as discussed above. Staff has removed those amounts from

2021

depreciable balances, as shown on Schedule GWB-16.

22

23

Staff amortizes the CIAC at a Staff calculated composite rate of 4.0543 percent, as shown

24

on Schedule GWB-16, as compared with the Company's use of a 5 percent depreciation

25

rate in its calculations.

26

2

1

Based on these adjustments, Staff calculates depreciation expense of \$158,621 offset by \$51,162 of amortization expense for (net) Depreciation and Amortization Expense of \$107,459, as shown on Schedules GWB-11 and GWB-16.

4

5

6

7

Q. What does Staff recommend regarding Depreciation and Amortization Expense?

A. Staff recommends an increase to Depreciation and Amortization Expense of \$6,443 from \$101,017 to \$107,459, as shown on Schedules GWB-11 and GWB-16.

8

9

10

11

12

13

14

Operating Income Adjustment No. 6 – Income Taxes

Q. Please describe the Company's proposal for Income Taxes.

A. The Company proposes Income Taxes of negative \$7,617. Since the Company is owned by an estate and any income from the estate would flow to individuals, the Company calculated its income tax expense using federal and state income tax rates that would apply to individuals.

Yes. Staff notes that the estate is a pass through entity and any income tax allowance

would be computed in accordance with the policy statement reflected in Decision No.

73739 in Docket No. W00000C-06-0149. In order to calculate an appropriate income tax

allowance, Staff visited the offices of Moyes, Sellers and Hendricks and reviewed the tax

return for the estate which reflected the Company activities only. In reviewing the estate's

tax return, Staff noted the existence of Net Operating Loss ("NOL") carry forwards of

\$386,240 at the beginning of the test year and \$321,051 at the end of the test year.

Looking further to determine the tax effects of the water company activities on its owners,

Staff notes that zero taxable income actually flowed through to the beneficiaries of the

15

16

17

A.

Q. Did Staff make any adjustments to test year Income Taxes?

18 19

20

2122

23

24

25

26 trust due to the NOL carry forward.

The policy statement included in Decision No. 73739 states, "Income tax expense shall be permitted based only upon the effective income tax rates of owners which have actual or potential state and federal income tax liability." Since the NOL carry forward of the estate forecloses the possibility of actual or potential tax liability to be borne by the beneficiaries of the trust (who are effectively the owners of the Company), Staff recommends that there be no income tax allowance for this Company at this time. The absence of tax liability is present during the test year and is expected to be extended for a number of years in the future.

Q. What is Staff's recommendation?

A. Staff recommends an increase of \$7,617 from a negative \$7,617 to zero to Income Tax Expense, as shown on Schedules GWB-11 and GWB-17.

Operating Income Adjustment No. 7 – Property Taxes

- Q. Please describe the Company's proposal for Property Taxes.
- A. The Company proposes Property Taxes of \$18,558, reflecting an Assessment Ratio of 20 percent.

Q. Does Staff agree with the Company's proposal for Property Taxes?

A. No. First, Staff referred to ARS §42-15001 and notes that the Assessment Ratio for 2013 is 19.5 percent. Second, Staff recognizes that any rates approved in this proceeding will likely be in effect starting in 2014 and through 2016 and recommends the use of Assessment Ratios that will be in effect in years after 2013. The Assessment Ratios are 19.0 percent, 18.5 percent, and 18.0 percent for 2014, 2015, and 2016, respectively, for an average Assessment Ratio of 18.5 percent.

See Decision No. 73739, paragraph 1 on page 3 of policy statement attached therein.

Q. What does Staff recommend?

Α.

Staff recommends the use of an 18.5 percent Assessment Ratio to be used in the calculation of Property Taxes for a decrease of \$1,392 from \$18,558 to \$17,167, as shown on Schedules GWB-11 and GWB-18

REVENUE REQUIREMENTS

Q. Please describe the methodology used by the Company to calculate its proposed revenue requirements.

A. Since the Company has a negative rate base, the Company seeks to have \$48,195 of cash flow to cover contingencies after it pays its expenses, debt service amounts, and repayments under its AIAC obligations. Using this target, the Company calculated a required operating income of \$86,099 which would represent an operating margin of 13.38 percent applied to its calculated revenue requirements of \$643,444 and would result in a DSC of 1.37.

In its application on Schedule A-1, the Company considers depreciation expense in its cash flow analysis and treats those funds as monies available to pay the Company's obligations.

Q. Please describe the methodology used by Staff to calculate Staff's recommended revenue requirements.

A. Staff calculates its recommended revenue requirements based on a cash flow analysis, subject to providing an adequate DSC ratio as required by WIFA. Staff also evaluated its revenue requirements to determine that the revenue requirements resulted in a reasonable operating margin.

At present, the Company's monthly obligation to WIFA is approximately \$9,401, or \$112,812 annually, including an approximate monthly payment of \$1,567, or \$18,804 annually, for Debt Service Reserve that is expected to cease with the Company payment on January 1, 2017. This results in net annual principal and interest payments of \$94,008, as shown on Schedule GWB-1. Staff's recommended revenue requirements of \$530,767 result in operating income of \$53,353. Adding depreciation expense of \$107,459 to Staff recommended operating income of \$53,949 provides \$160,812 of cash from which Staff subtracts the obligations of \$112,812 for WIFA principal and interest and Debt Service Reserve payments which leaves \$48,000 for contingencies and other obligations.

The Company also reports \$23,596 of annual repayments under its AIAC obligations.

Staff's typical practice is to calculate the DSC using principal and interest and excluding both payments for the Debt Service Reserve and repayments under AIAC obligations since this practice reflects those at WIFA. Excluding both of these payments would result in a DSC of 1.71. Based on WIFA practices, the DSC of 1.71 would be used when evaluating compliance with WIFA debt covenants.

For informational purposes only, although Staff and WIFA do not consider repayments under AIAC obligations when calculating the DSC, Staff has recalculated a DSC of 1.37, including the repayments under AIAC obligations but not the payments to the Debt Service Reserve.

Staff also notes that the operating income of \$53,353 represents a 10.05 percent operating margin. A cash flow of \$48,000 and operating margin of 10.05 percent provides the Company with adequate cash flow to meet its obligations.

Q.

What is Staff recommending?

A. Staff recommends revenue requirements of \$530,752, as shown on Schedules GWB-1.

3

4

5

6

7

8

9

2

1

Other Considerations

Does Staff have additional comments? Q.

Yes. As discussed above, the Company is out of compliance regarding the filing of a plan A. to reduce its water loss to less than 10 percent. As a result, Staff recommends that any rates approved in this proceeding not become effective until the Company satisfies this requirement.

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

Staff further recommends that the Company take the necessary steps to settle the estate so the Company can resume a more traditional form of ownership and hire its own manager instead of using a Staff appointed interim manager. The estate of William F. Randall came into being in 2005. The continued ownership of the Company by an estate has resulted in additional legal fees that would otherwise be unnecessary, as the Company is represented by two separate law firms. As discussed above, this practice has resulted in additional legal expenses being borne by the ratepayers. Furthermore, Staff references a prior Order to Show Cause ("OSC")² proceeding in which the Company committed numerous and significant violations that jeopardized the provision and quality of service to its ratepayers. The OSC proceeding resulted in the appointment of an interim manager and resolution of the violations. Staff concludes the present form of ownership is not in the public interest and the continuation of such ownership of the Company should be discouraged. To these ends, Staff recommends that any cash flow or earnings of the Company not be distributed to its owners until the estate is settled, the Company is owned under a more traditional form of ownership, the Company directly retains its own

² See Docket No. W-01431A-07-0462, Decision No. 69882 dated August 28, 2007.

1 2

competent management, and the Company can manage being represented by no more than one counsel.

Also discussed above, Staff's recommended revenue requirements include adequate cash flow to pay \$1,567 per month, or \$18,804 annually, for the Company's Debt Service Reserve to WIFA and that this obligation is expected to cease in January 2017. Since the Debt Service Reserve represents funds available for the Company's use at a later time, Staff recommends that beginning with the effective date of the decision in this proceeding, the Company be required to account for the monies to meet its Debt Service Reserve and record those amounts as a regulatory liability to be evaluated in a subsequent rate proceeding. Staff also recommends that the Company be required to file a subsequent rate case by June 30, 2017 using a test year no later than December 31, 2016.

Q. Does this conclude your direct testimony?

A. Yes, it does.

Estate of William F. Randall dba Valle Verde Water Company

EXECUTIVE SUMMARY THE ESTATE OF WILLIAM F. RANDALL DBA VALLE VERDE WATER COMPANY DOCKET NO. W-01431A-13-0265

The Estate of William F. Randall dba Valle Verde Water Company ("Valle Verde" or "Company") is a certificated Arizona public service corporation that provides water service near the City of Nogales in Santa Cruz County. The average number of customers for the Company during the test year was approximately 760 customers in its 1.5 square mile service territory.

Typical 5/8 x 3/4-inch meter residential customers with a median usage of 5,171 gallons would experience a \$10.20 or a 39.16 percent increase in their monthly bill from \$28.20 to \$38.39 under the Company's proposed rates and a \$1.98 or a 7.01 percent increase in their monthly bill from \$28.20 to \$30.17 under Staff's recommended rates.

Staff recommends approval of its recommended rates and charges as shown on the attached schedules.

INTRODUCTION

- Q. Please state your name, occupation, and business address.
- A. My name is Gerald Becker. I am an Executive Consultant III employed by the Arizona Corporation Commission ("Commission") in the Utilities Division ("Staff"). My business address is 1200 West Washington Street, Phoenix, Arizona 85007.

Q. Briefly describe your responsibilities as an Executive Consultant III.

A. I am responsible for the examination and verification of financial and statistical information included in utility rate applications. In addition, I develop revenue requirements, and prepare written reports, testimonies, and schedules that include Staff recommendations to the Commission. I am also responsible for testifying at formal hearings on these matters.

Q. Please describe your educational background and professional experience.

- A. I received a Masters of Business Administration with an emphasis in Accounting from Pace University. I am a Certified Public Accountant and a Certified Internal Auditor. I am a member of the Arizona State Society of Certified Public Accountants.
 - I have participated in multiple rate, financing and other regulatory proceedings. I attended the National Association of Regulatory Utility Commissioners ("NARUC") Utilities Rate School.
 - I began employment with the Commission as a utilities regulatory analyst in April 2006. Prior to joining the Commission, I worked as an Auditor at the Department of Economic Security and Department of Revenue in the Taxpayer Assistance Section. Prior to those

2

1

jobs, I worked for 15 years as an Auditor, Analyst, Financial Analyst, and Budget Manager at United Illuminating, an investor-owned electric company in New Haven, CT.

3

4

Q. What is the scope of your testimony in this case?

56

A.

I am presenting Staff's analysis and recommendations regarding Chaparral City Water Company's ("Company" or "CCWC") applications for permanent increases in its rates and charges.

7

8

9

Q. What is the basis of your current testimony in this case?

10

11

A. Based on the adjustments and revenue requirements recommended by Staff, I am presenting Staff's recommended rate designs.

12

BACKGROUND

14

13

Q. Please review the background of these applications.

1516

A.

"Company") is a certificated Arizona public service corporation that provides water

The Estate of William F. Randall dba Valle Verde Water Company ("Valle Verde" or

17

service to customers near the City of Nogales in Santa Cruz County. Valle Verde is

18

owned by the estate of William F. Randall.

19

20

The Company's current rates were authorized in Decision No. 71899 dated September 20,

21

2010. That Decision authorized a \$285,075 revenue increase, or 103.04 percent increase

22

over then test year revenues of \$276,656, that provided a 10.09 percent operating margin

23

rate of return. The negative fair value rate base of \$593,061 was not meaningful.

2425

Decision No. 71899 also authorized a temporary surcharge of \$.60 per thousand gallons to pay for indebtedness to the City of Nogales for water that was purchased when Valle

26

Verde had problems with its own wells.

On May 17, 2012, the Company filed the Company filed an application pursuant to A.R.S. §40-252 asking the Commission to amend Decision No. 71899 to continue a temporary surcharge and to apply the revenues gained thereby to pay Southwestern Utility Management, Inc., the Company's interim ("Interim Manager") which had been appointed by the Commission in 2007 to ensure the continuation of adequate service at reasonable rates. The Company had been owned and operated by William F. Randall; after his death, the Company fell into financial and operational disarray. At that time, the Company owed the Interim Manager \$78,589.03. The Commission issued Decision No. 73353 (August 21, 2012) which authorized continuation of the surcharge to pay indebtedness owed to the Company's Interim Manager, subject to certain conditions discussed more fully therein.

The debt to the Interim Manager is expected to be repaid by the time that the instant case will be decided, and is not included in Staff's recommended revenue requirements in this proceeding.

RATE DESIGN

- Q. Did Staff prepare schedules showing the present, Company-proposed, and Staff-recommended rates and charges?

A. Yes. Staff Schedule GWB-1 shows the present monthly minimum charges and commodity rates, the Company's proposed monthly minimum charges and commodity rates and Staff's recommended monthly minimum charges and commodity rates. The schedules also show the present, proposed and recommended service charges. A summary of the present, Company-proposed and Staff-recommended rates is presented in the following section.

A.

Q. Would you please summarize the present rate design for Valle Verde?

A. The present monthly minimum charges by meter size are as follows: 5/8 x 3/4-inch \$18.00, 3/4-inch \$18.00, 1-inch \$43.00, 1 1/2-inch \$86.00, 2-inch \$138.00, 3-inch \$275.00, 4-inch \$429.00, and 6-inch \$857. No gallons are included in the monthly minimum charge. The residential water commodity rate for the 5/8 x 3/4-inch and 3/4-inch customers is \$1.30 per thousand gallons for zero to 3,000 gallons, \$2.90 per thousand gallons for 3,001 to 10,000 gallons, and \$4.25 per thousand gallons for any consumption over 10,000 gallons. The larger residential, commercial, and hydrant commodity break-over points vary by meter size, but are \$2.90 per thousand gallons for the first tier and \$4.25 per thousand gallons for any consumption over the first tier. The present rate design also has monthly minimum and commodity charges for hydrant and governmental customers that are billed the same rates as the commercial customers.

Q. Would you please summarize the Company's proposed rate design?

The Company's proposed monthly minimum charges by meter size are as follows: 5/8 x 3/4-inch \$25.00, 3/4-inch \$25.00, 1-inch \$62.50, 1 1/2-inch \$125.00, 2-inch \$200.00, 3-inch \$400.00, 4-inch \$625.00, and 6-inch \$1,250.00. Zero gallons are included in the monthly minimum charge for all customers. The Company proposed changes to the break over points for both residential and commercial 5/8 x 3/4-inch and the 3/4-inch customers. The Company proposes a 3-tier inverted residential commodity rate for the 5/8 x 3/4-inch and 3/4-inch customers of \$1.75 per thousand gallons for zero to 3,000 gallons, \$3.75 per thousand gallons for 3,001 to 7,000 gallons, and \$5.53 per thousand gallons for any consumption over 7,000 gallons. The other proposed residential commodity rate tiers vary by meter size, but are \$3.75 per thousand gallons for the first tier and \$5.53 per thousand gallons for any consumption over the first tier. The Company is proposing an increase in its meter and commodity charges for commercial, governmental, and hydrant customers.

2

1

The Company is not proposing any increases to the monthly and commodity charges for private fire service.

3

4

10

11

12

13

14

15

16

17

18

19

Q. Would you please summarize Staff's recommended rate design?

A. Staff's recommended rates and charges are presented on Schedule GWB-1. recommended monthly minimum charges by meter size are as follows: 5/8 x 3/4-inch \$20.00, 3/4-inch \$20.00, 1-inch \$50.00, 1 1/2-inch \$100.00, 2-inch \$160.00, 3-inch \$320.00, 4-inch \$500.00, 6-inch \$1,000, 8-inch \$1,600 and 10-inch \$2,300 and 12-inch \$4,300. Zero gallons are included in the monthly minimum charge for all customers. Staff agrees with the Company's proposed changes to the break over points for both residential and commercial 5/8 x 3/4-inch and the 3/4-inch customers. For the 5/8 x 3/4inch and 3/4-inch residential customers, Staff recommends a 3-tier inverted rate design with commodity charges of \$.90 per thousand gallons for zero to 3,000 gallons, \$3.38 per thousand gallons for 3,001 to 7,000 gallons, and \$4.80 per thousand gallons for any consumption over 7,000 gallons. Staff's recommended larger residential, commercial, and hydrant commodity rates have two tiers and vary by meter size, set at \$3.38 per thousand gallons for the first tier and \$4.80 per thousand gallons for any consumption over the first Staff recommends increases in meter and commodity charge for commercial, tier. governmental and hydrant customers. Staff recommends no increase to the monthly or commodity charge for fire sprinkler service, to remain the greater of \$10.00 or 2 percent of the monthly minimum charge for that meter size.

Q. What is the rate impact on a typical $5/8 \times 3/4$ -inch meter residential customer?

A. The typical 5/8 x 3/4-inch meter residential customer with a median usage of 5,171 gallons would experience a \$10.20 or a 39.16 percent increase in his monthly bill from \$28.20 to \$38.39 under the Company's proposed rates and a \$1.84 or a 6.53 percent increase in his monthly bill from \$28.20 to \$30.04 under Staff's recommended rates. A typical bill analysis is provided on Schedule GWB-2.

MISCELLANEOUS SERVICE CHARGES

- Q. Does Staff have any comments related to service charges?
- A. Yes. Staff agrees with the Company's proposed Service Charges, with the following exceptions:

The Company currently has an establishment of service after-hours charge of \$40 and wants to keep this rate in place. The Company also has a reconnection of service after-hours charge of \$50.00 and wants to keep this rate in place.

Staff agrees that an additional fee for service provided after normal business hours is appropriate when such service is at the customer's request. Such a tariff compensates the utility for additional expenses incurred from providing after-hours service. Moreover, Staff concludes that it is appropriate to apply an after-hours service charge in addition to the charge for any utility service provided after hours at the customer's request. Therefore, Staff recommends the removal of both the establishment of service – after hours charge and reconnection of service after-hours charge. For example, under Staff's proposal, a customer would be subject to a \$30 establishment of service if it is done during normal business hours, but would pay an additional \$20 after-hours fee if customer requested that the establishment of service be done after normal working hours.

- Q. What does Staff recommend?
- A. Staff recommends the approval of its Services Charges as shown on Schedule GWB-1.
- Q. Does this conclude your direct testimony?
- A. Yes, it does.
